Introductory Words: _____

- ⑥ Because of this, most life in the loch stays close to the surface.

Introductory Words: _____

Name _____

Instructions: Read the text below. Using a thesaurus, find two synonyms for each underlined word. Write the synonyms on the lines below the text. Then re-read the text, replacing each underlined word with one of the synonyms written below.

People kept Nessie sightings quiet until the 1930s. That is when cameras became popular. Nessie hunting took off with a flash. People wanted to catch Nessie, at least in a picture.

Thousands of people who live in the area have signed a statement promising that they've seen the monster. Most sightings have occurred near the Urquhart (ur-kwart) Castle ruins. The castle ruins are located near the midpoint of the loch where the water is deepest.

Sightings of strange water creatures are not unique to Loch Ness. People have reported seeing similar creatures in at least 265 lakes and rivers around the world. Some people think the creatures must be a type of saltwater mammal or fish.
