- 11. Answers will vary but should indicate some similarities between the mad tea party and a real party. For example, the guests are eating and drinking together, having a conversation, telling jokes and stories, and having a good time. The answers will then indicate differences, such as the fact that it is always six o'clock, that the people having tea are talking animals, and that the place settings seem never to be changed or washed.
- 12. Answers will vary but should indicate the following: It is during the mad tea party that the reader learns that Time is an actual person and that time doesn't operate in the same predictable, reliable way as it does in the real world. Time is yet one more example of how the rules of the real world simply do not apply in Wonderland. The Wonderland setting, meanwhile, shapes the actions and characters in this scene, with its world of miscommunication, word play, and craziness. Once again, animals can talk, stories and riddles don't make sense, and ordinary things are done in unordinary ways.
